

WEBSITES FOR NAMIBIAN BUSINESSES

Your customers are searching for you. Right now they find nothing.

We build small business websites here in Namibia, and we look after them for you. Your own address on the internet, your photos, your prices, your opening hours — on the phone your customers actually carry. One monthly fee covers all of it: the building, the hosting, the domain, and the changes you ask for later.

01

A real website, not a social page

Your own domain name, your photographs, your prices, directions that open in Google Maps, and a button that starts a WhatsApp chat with you. Built to load on an old phone and a slow connection.

02

We keep it running

You never touch a server, a renewal or an update. When your prices change or the season changes, send us a message and we change it. That is part of the monthly fee, not an extra invoice.

03

No big bill at the start

No setup fee and no multi-year contract. If it does not earn its keep, you stop paying and we hand you your domain and your content. That is the whole risk you are taking.

Let us show you what yours would look like

A twenty-minute conversation, no charge and no obligation. Bring your photos if you have them — if you do not, we will sort that out too. Write to team@namibway.com or talk to the person who handed you this.

N\$ 399

per month, everything included

WHAT IS INCLUDED

- ◆ Your own domain name — registered and renewed for you
- ◆ Built for phones first, then for computers
- ◆ Your photographs, cropped and tidied so they look right
- ◆ Prices, opening hours and directions, kept current
- ◆ A map that opens straight into Google Maps
- ◆ A WhatsApp button that starts a chat with you
- ◆ A contact form that arrives in your email
- ◆ English and German, further languages on request
- ◆ Google Maps and Google Business Profile set up properly
- ◆ A secure address (https), so browsers do not warn people off
- ◆ Hosting and backups, monitored by us
- ◆ Changes when you need them, at no extra cost

HOW IT WORKS

1

One conversation

Twenty minutes, in person or on the phone. What you do, who your customers are, what they always ask you before they book or buy.

2

We build a draft

About a week later you see a real website, not a sketch — with your photos and your text already in it. Nothing to pay at this point.

3

You correct it, it goes live

You tell us what is wrong and we fix it. Then it goes online and the monthly fee starts. From there it is ours to look after.

What it costs

N\$ 399 per month, everything included. No setup fee, no charge for the draft, no annual contract. The domain, the hosting and the changes you ask for are all inside that number.

Things that genuinely cost more — a full photo shoot, an online shop that takes payments, advertising budgets — we quote separately and tell you before, not after.

If you need more than a website

We also build proper software: booking and reservation systems, stock and order tracking, internal tools, links between systems you already run, and mobile apps.

This is the same team that built and operates NamibWay — a travel booking platform running in production, with backups, monitoring and automated deployments. Priced per project, after we understand it.

QUESTIONS PEOPLE ASK

Do I need to understand computers?

No. You send us a message when something needs changing and we change it. If you can send a photograph on your phone, you can keep your website current.

I already have a domain name.

Then we move it across, or point it at the new site — whichever suits you. It stays registered in your name either way, and there is no extra charge for doing it.

Who owns it in the end?

You do — the domain, the words and the photographs. If you decide to stop, we hand all of it over rather than holding on to it. We would rather lose a customer than trap one.

Let us take a look at your business.
